

Traffic Cone Adapter

When traffic control, construction, or accident scenes need elevated lighting for extra visibility, PowerFlare® Safety Lights can be mounted on top of any standard traffic cone using our patent-pending Cone Top Adapter.

The Cone-Top Adapter (CTA-001) can be used with magnetic PowerFlare® Safety Lights, which attach to an embedded metal disc, allowing for quick and easy installation and removal. For PowerFlare units without magnets, elastic cords (included) makes securing the beacon a snap!

Available individually or in kits with PowerFlare Safety Lights

Superior visibility in all conditions.

Available kits include one CTA-001 per PowerFlare, and are available in packages of 2, 4, 8, 12, and 24. Standard kits come with red or amber LEDs in yellow shells.

CAGE Code: 311L3
DUNS: 14-8475-812

CTA-001s are available in a variety of package sizes in custom carry bags. Each CTA-001 is supplied with an elastic cord and a spare.
